- Cloud Application Development
- Cloud Enablement (PaaS, IaaS, SaaS)
- Infrastructure Management Services
- Virtual Desktop Infrastructure

» Success Stories

Leading **Tourism** Company improves server management by migrating to private cloud.

Challenge: For supporting its complex & diversified operations, the client maintained a large inventory of disparately located servers across three geographies, which were difficult to manage and involved high operating cost.

Solution: AgreeYa implemented a scalable private cloud solution utilizing Microsoft System Center 2012, enabling the client to centrally manage & monitor their IT infrastructure. In addition the client was able to realize increased resource utilization without compromising security & control.

Real Estate major enhances business agility by migrating to Office 365.

Challenge: To provide essential IT services to its largely mobile workforce, the client relied on 'on-premise' licensed solutions that required upfront investment and presented barriers to communication.

Solution: A Microsoft Gold Partner, AgreeYa, helped the client adopt a more flexible-'pay as you go' Office 365 solution. This cloud based solution enabled its agents to access essential business information from anywhere and on any device, leading to increased savings and business agility.

» Success Stories

Migration to Windows Azure eliminates upfront IT expenses for a **Non-Profit** Organization.

Challenge: For supporting real-time access & storage of feedback & grading data from more than 200 schools across the US, the organization had to maintain large inventory of computing resources, involving large operating cost.

Solution: AgreeYa, helped the organization migrate its feedback & grading application to a much flexible & scalable Windows Azure platform, enabling it to avoid upfront IT expenses and realize tremendous savings compared to an on-premise solution.

Adoption of a scalable VDI solution simplifies IT management for a **Public Health** institution.

Challenge: The hospital wanted to provide reliable, fast and up to date machines to its staff responsible for providing direct medical care to some 200,000 patients annually while keeping operating costs low. In addition it wanted to centralize software management.

Solution: AgreeYa implemented a VDI solution utilizing VMware technology with Wyse thin clients, providing the medical staff access to faster and more reliable computing resources while allowing the hospital to streamline IT management practices and help reduce the stress of managing each machine separately.
